

Programming for Computerteknologi

Week 4: Assignment

Exercise 1

```
int area(int x1, int x2, int y1, int y2) {
    return (x2 - x1) * (y2 - y1);
}
```

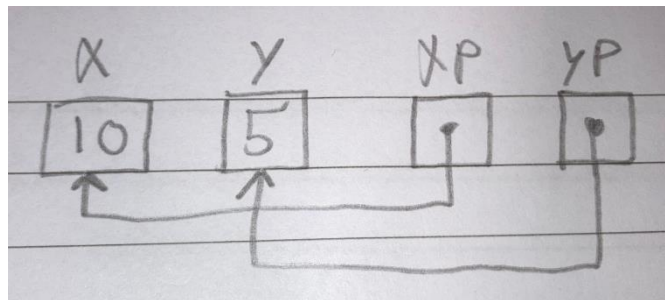

Exercise 2

```
void increment(int *p) {
    *p += 1;
    return;
}
```

Exercise 3

At the end of the program the values of the variables are:

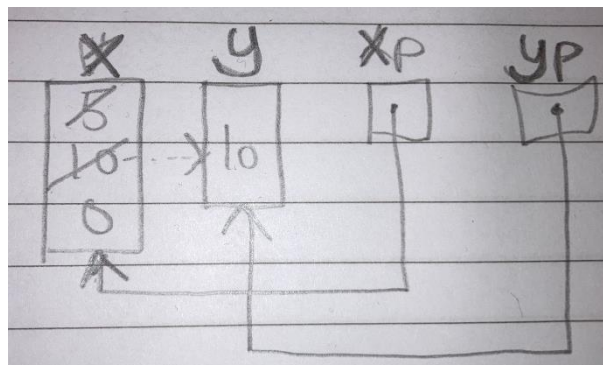

x	y	xp	yp
10	5	10	5

Exercise 4

At the end of the program the values of the variables are:

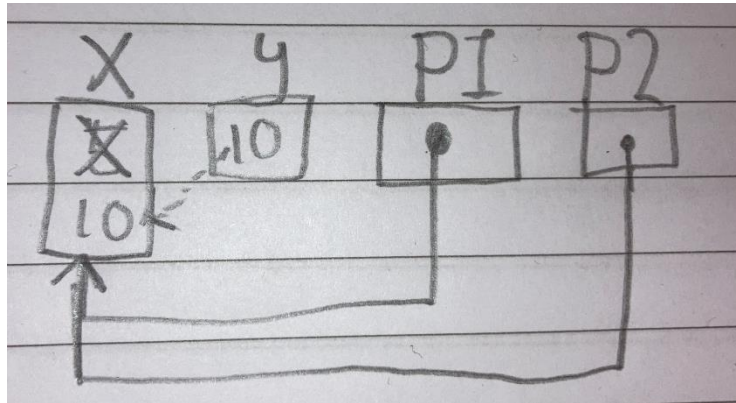

x	y	xp	yp
0	10	0	10

Exercise 5

At the end of the program the values of the variables are:

x	y	xp	yp
10	10	10	10

**Exercise 6**
